

## Mix Package

Activation: \*110\*5#

Balance check: \*107#

If the amount of MB or minutes are fully used before the bundle expiration date, charging will be continued from another voice or internet balance (if such exist) or from the number balance according to the standard price: 1 min. – 0,20 ₺; call setup – 0,10 ₺; 1 MB – 0,10 ₺

If you purchase the same bundle before the already activated one expires, the existing bundle will be annulled and the new one will become valid.

You can activate other voice or data packages together with the mix package. In this case, charging will occur on the balance that expires earlier.

Automatic prolongation is not available for this bundle. After expiration, the bundle will be deactivated. As a result, the remaining amount of MB and minutes will be annulled. Charging will be continued from other balances (if such exist) or from number balance according to the standard price: 1 min. – 0,20 ₺; call setup – 0,10 ₺; 1 MB – 0,10 ₺.

All Beeline subscribers are sent SMS messages with a warning about the expiration of any balance.

Mobile data service quality parameter: Delay up to 300 milliseconds.

Service can be activated via [MyBeeline App](#) as well.
